

St. Andrew Catholic School

Technology Use Agreement

Grades 3 - 8

Technological devices are very useful tools in today's world. They are also very complicated and expensive. Internet access is helpful in achieving educational goals. However, information obtained over the internet can be inaccurate, illegal, or offensive. In order for our school to provide and maintain devices and network access for all our students and teachers to use, the following policies and rules will apply:

1. I will handle all school technology gently and respectfully.
2. I will keep my hands only on the devices assigned to me.
3. My work using school technology will include only proper words and pictures.
4. I will not change settings or download unauthorized content, apps, or software on any school device.
5. I will have any portable storage device brought from home checked by the teacher.
6. I will use the internet:
 - (a) for **research purposes only** (no chat, IM, social networking, YouTube, or unauthorized games)
 - (b) with **teachers' specific permission**
 - (c) with **direct teacher supervision**

I have read and agree to comply with all of these policies and rules, or I will lose the privilege of using the technology for a period of time to be determined by the teacher and the principal. I understand additional disciplinary measures may be taken.

Student Name _____ Grade _____
Student Signature _____ Date _____
