St. Andrew Catholic School
Acceptable Use Policy for Robotics

The purpose of this policy is to ensure that the use of the Robotics laptop computers, network, robotics equipment, and its software at St. Andrew Catholic School is consistent with the educational goals and policies of our school and diocese. Access to robotics equipment and its technology is a privilege that requires responsibility. Inappropriate use will result in suspension or cancellation of privileges, with additional disciplinary measures as deemed appropriate by the teacher and the principal.

The laptop computers are strictly for the use of the robotics program and are subject to inspection by the teacher at any time. Students are not allowed to access non-robotic information or use programs and software that are not used for robotics. However, St. Andrew Catholic School cannot be held liable for unauthorized computer activity should a student choose to disregard these rules.

Students must respect: the robotics equipment and its technology, the intellectual property of other students, and other students' robots and programs. Students must follow local and international copyright laws.

Students must follow the school's Acceptable Use Policy for Technology, iPad Acceptable Use Policy, and Technology Use Agreement.

I have read and understand the above policy.
