- **Technology Tidbit:** May is Mental Health Awareness Month. It's a good time to talk with your children about **how using screens and tech makes them feel**. Help them be mindful of their tech habits and what they're doing with their time online. Screen limits can also be helpful—check out these tips on balancing tech use for grades **K–5** and **6–12**. However, keep in mind the important question is how kids are using screens, rather than just for how long. Talk through different strategies your kids can try when they notice themselves feeling uncomfortable, worried, sad, or anxious when they're online. Plus, make sure they know they can go to trusted adults for help.
